The official opening ceremony was attended by representatives of the St. Petersburg Government, specialised committees, professional unions and associations. The honorable guests of the opening ceremony admitted high organizational level of the shows and expressed a strong belief that the exhibitions will become a driver for the further industry development.

Innovations in Construction Award and **New Energy Contest** (supported by St. Petersburg Committee on Environmental Management, Environmental Protection and Ensuring Environmental Safety) were the integral parts of the opening ceremony nominating the companies that develop energy- and resources-saving equipment for HVAC systems.

Igor Serebritsky, Deputy Chair of the Committee, announced the New Energy Contest winners: Paskal (water pressure regulators), Isola (flexible heat-isolated pipes for heating and water supply), Tchradius (cooling tool), Ecwatel (smart water control with radio channel).

April 17–19, 2018

CEC "EXPOFORUM"
St. Petersburg, Russia

aquatherm-spb.com

In the frames of business programme the 21st Conference **High-Technology Buildings** was held. The conference program included seminars on top industry trends: "HoReCa: providing required microclimate of premises for various functional purposes", "Building Information Modeling (BIM) – software for efficient design and calculation of engineering systems for buildings and facilities" and a master class "Smoke ventilation systems".

The conference was attended by **186 specialists** – designers, engineers, technical directors and other specialists responsible for engineering systems' design. The conference was organised jointly with the Russian Association of HVAC Engineers.

The next Aquatherm event in the Russia's North-West – the 6th International exhibition of heating, water supply, ventilation equipment and climate control systems Aquatherm St. Petersburg will be held on **April 18–20, 2019** in EXPOFORUM, St. Petersburg. The show will be co-located with WorldBuild St. Petersburg / InterStroyExpo, Design&Décor St. Petersburg and CountryLiving exhibitions.

The joint location of four shows will provide the following advantages:

- Synergetic effect from the unification of all construction topics, including suburban housing construction;
- Additional audience of visitors: consumers and companies specializing in suburban construction;
- Growth of the exposition.

See you at Aquatherm St. Petersburg 2019!
